"Technical Poster Presentation Contest on "Sustainable Manufacturing Advancing Industrial Efficiency"

III Year students of Mechanical Engineering participated in technical poster competition on the topic **"Technical Poster Presentation Contest on "Sustainable Manufacturing Advancing Industrial Efficiency"**. The students through their knowledge and concepts prepared various posters relevant to the given topic and presented themselves.

The competition witnessed enthusiastic participation of the students with more than 20 teams presenting their posters. Each team consisted of 1-3 students, representing various disciplines such as Engineering, Information Technology, and Applied Sciences.

Posters were evaluated by a panel of expert judges comprising professors, industry professionals, and researchers. The criteria included:

- Relevance to theme
- Innovation and originality
- Clarity of content

The Intercollege Technical Poster Competition was a resounding success, fostering intercollegiate collaboration and encouraging students to think creatively and technically. The event concluded with a vote of thanks and an expression of intent to make it an annual tradition.
